

IMI WEB-Recognising Adverse Drug Reactions (WEB-RADR) Stakeholder Event Agenda

“Are we ready for the new vigilance world?”

7 September 2017

ETC. Venues St. Paul's, 200 Aldersgate, London EC1A 4HD

Introduction

The Innovative Medicines Initiative (IMI) WEB-Recognising Adverse Drug Reactions (RADR) project Stakeholder Event aims to showcase WEB-RADR's outputs, scientific and policy recommendations, and sustainability strategy.

Over the three years of the project WEB-RADR has gathered information and expertise on the use and value of social media and mobile technologies for pharmacovigilance. WEB-RADR has developed and delivered a variety of tools including mobile applications, social media dashboards and recommendation documents.

The event will provide a platform for exchange of views and ideas for building on the future of pharmacovigilance in the digital age, and promote the mechanism by which the project deliverables will be sustained.

Themes

The theme sessions will consist of short presentations delivered by subject matter experts followed by e-facilitated table discussions.

Theme 1: Approaches to using social media for pharmacovigilance

Theme 2: Using mobile technology for real-time pharmacovigilance

Theme 3: Sustainability and future opportunities

Theme 4: Maximising the value of mobile health in the new vigilance world

Outputs

A written report will be made publicly available on the WEB-RADR website following the event.

Registration	09:00
Welcome and introduction June Raine, MHRA	09:30
A view from the Innovative Medicines Initiative Colm Carroll, Innovative Medicines Initiative	09:45
