1. Overview of Collaborative User Interface

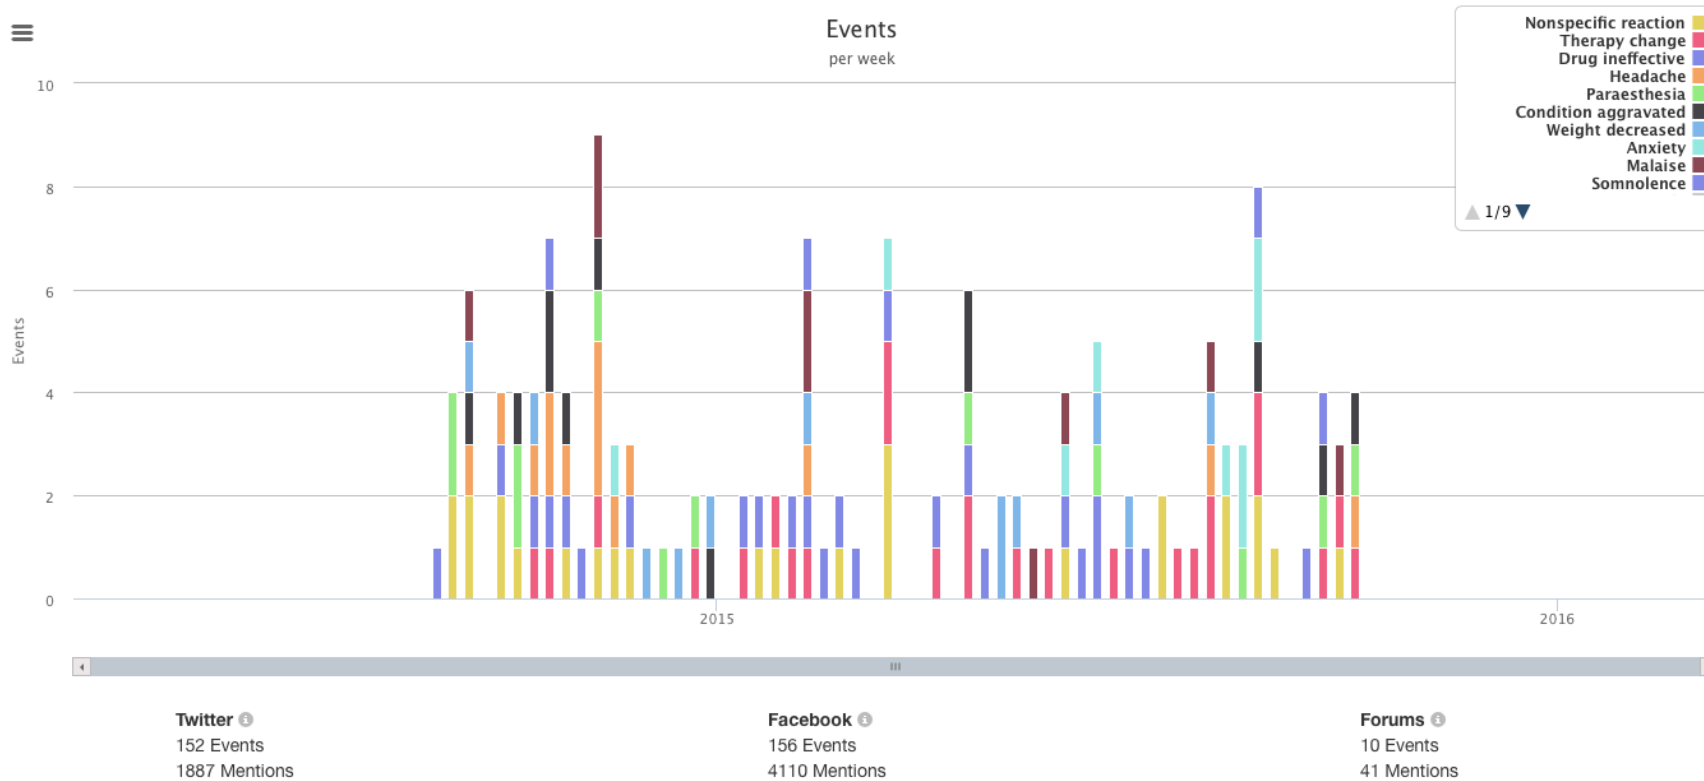

WP2A, have developed a collaborative user interface to visualise and review social media data: <http://webradr.medwatcher.org>.

Organisation-specific user accounts have been created to enable dashboard access by all consortium partners. The interface displays aggregate and granular social media data relevant to the products selected for monitoring for WEB-RADR, with different screens that facilitate review of social media data at the individual "case" level, as well as at the aggregate level.

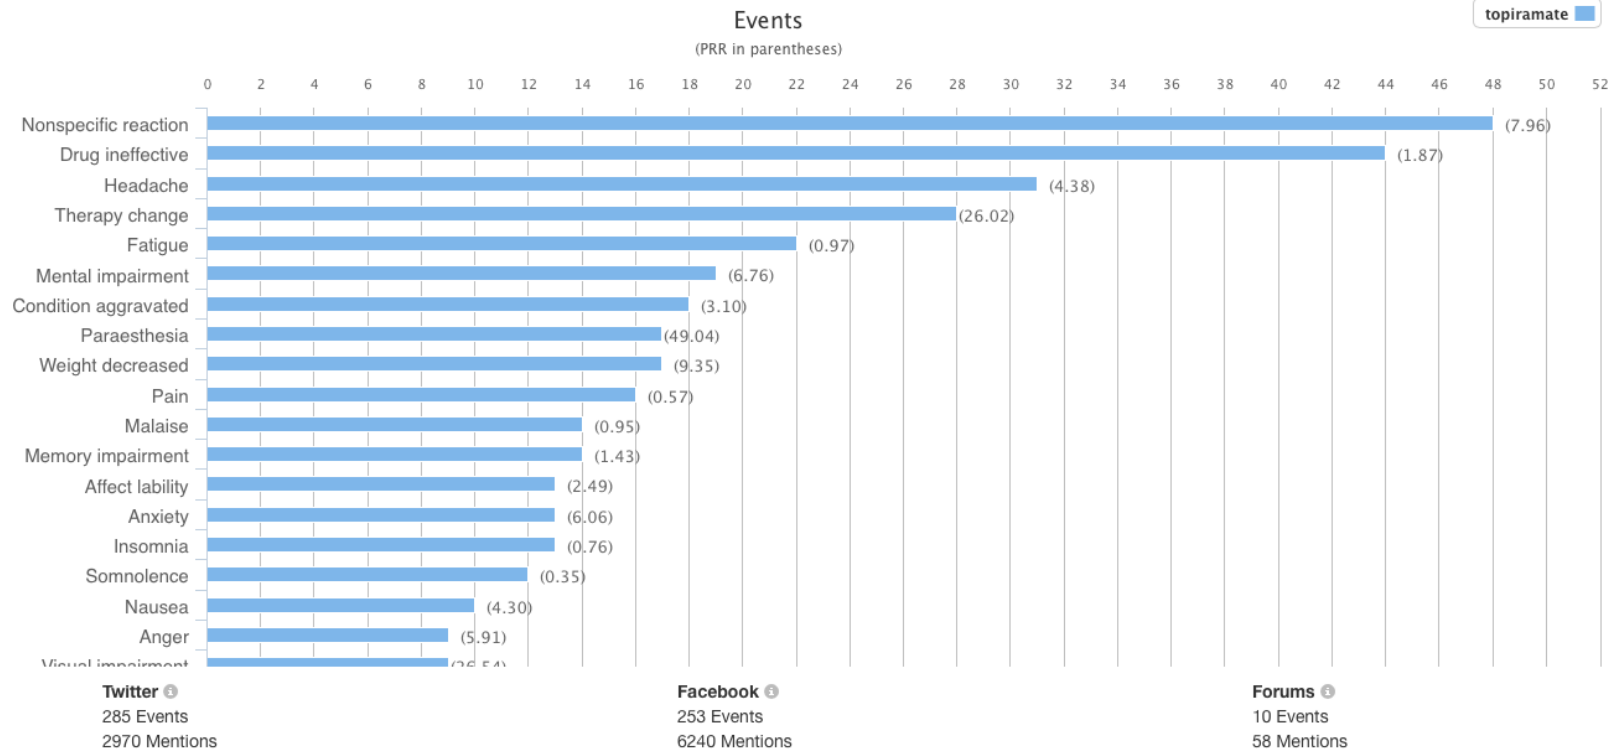

User experience and functionality of the interface will be reviewed by WP2A participants and refined to support use cases and work flow, as determined by end-users, as well as findings made by evaluations conducted by WP2B and WP4.

This document displays images of the user interface showing data for 'topiramate'.
